Sasol achieves beneficial operation of second Lake Charles Chemicals Project production unit; ratings and funding covenant update

Sasol provided an update on the Lake Charles Chemicals Project (LCCP) in an announcement on 22 May 2019. The announcement included reference to the fact that beneficial operation of the Ethylene Glycol (EG) facility had been achieved, with the beneficial operation of the Ethylene Oxide (EO) facility expected within days.

Sasol is pleased to announce that the EO facility achieved beneficial operation on 31 May 2019. The combined EO/EG unit is the second of the seven LCCP production units to come online.

Management continues to take actions to mitigate the impact of LCCP’s revised capital cost on the business, whilst ensuring these actions do not adversely impact Sasol’s long term sustainability. Sasol still expects peak gearing in FY19 and with net debt to EBITDA for FY19 remaining within the 2,0 – 2,3x guidance range. The net debt to EBITDA covenant applicable to the $3,9bn Revolving Credit Facility has been amended from 2,5x to 3,0x.

Following the LCCP announcement, Standard & Poor’s and Moody’s both affirmed Sasol’s investment grade rating, with Moody’s amending its outlook to negative.

Disclaimer – Forward-looking statements

Sasol may, in this document, make certain statements that are not historical facts and relate to analyses and other information which are based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to our future prospects, developments and business strategies. Examples of such forward-looking statements include, but are not limited to, cost estimates and expected timing of beneficial operation of LCCP, targets or guidance regarding our gearing ratio and dividend pay-out ratio, net debt-to-EBITDA ratio, EBITDA and internal rate of return for LCCP, as well as statements regarding our future liquidity, credit ratings and non-core asset disposal strategy. Words such as “believe”, “anticipate”, “expect”, “intend”, “seek”, “will”, “plan”, “could”, “may”, “endeavour”, “target”, “forecast” and “project” and similar expressions are intended to identify such forward-looking statements, but are not the exclusive means of identifying such statements. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and there are risks that the predictions, forecasts, projections and other forward-looking statements will not be achieved. If one or more of these risks materialise, or should underlying assumptions prove incorrect, our actual results may differ materially from those anticipated. You should understand that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors are discussed more fully in our most recent annual report on Form 20-F filed on 28 August 2018 and in other filings with the United States Securities and Exchange Commission. The list of factors discussed therein is not exhaustive; when relying on forward-looking statements to make investment decisions, you should carefully consider both these factors and other uncertainties and events. Forward-looking statements apply only as of the date on
which they are made, and we do not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise.
