

safety, health & environmental policy

We, the people of Sasol, striving for excellence in all we do, recognise the impact that our activities can have on people and the environment. Safety, health and protection of the environment will form an integral part of our planning and decision making. We will manage our company, wherever we do business, in an ethical way that strikes an appropriate and well reasoned balance between economic, social and environmental needs.

We are committed to:

- *Conducting our business with respect and care for people and the environment*
- *Responsible utilisation of natural resources*
- *Implementing responsible care for all Sasol's chemical and associated businesses. Non-chemical businesses will implement appropriate, recognised codes of practice*
- *Continually improving our safety, health and environmental performance*
- *Complying, as a minimum, with all applicable legal and other agreed requirements*
- *Promoting dialogue with stakeholders about safety, health and environmental performance*
- *A 'cradle to grave' approach to the products we develop, manufacture, use, distribute and sell*
- *Informing and appropriately training all employees and contractors on safety, health and environmental matters*
- *Responding effectively to safety, health and environmental emergencies involving our operations and products*
- *Engaging with relevant authorities and institutions on the formulation of legislation, standards and the implementation thereof*
- *Benchmarking internationally on best safety, health and environmental practices*
- *Sharing safety, health and environmental risk reduction best practices throughout Sasol*
- *Providing appropriate resources required to implement the above*

We will achieve these by:

- *Implementing internationally recognised safety, health, environmental and quality management systems*
- *Developing and implementing inherently safer and cleaner technologies*

Pat Davies
Chief executive

Revision number: 3 Revision date: June 2007
